## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: Wilkinson discloses processing encoded signals. The prior art does not specifically disclose: a video encoding method of encoding an input video signal by a motion compensation predictive interframe encoding, comprising: selecting, from a plurality of predictive modes, a predictive mode including determining a motion vector of a to-be-encoded pixel block by using a motion vector of an encoded pixel block of a reference frame adjacent to the to-be-encoded frame; computing a first cost of encoding based on the selected predictive mode; computing a second cost of encoding based on a direct mode including determining a motion vector of the to-be-encoded pixel block from a motion vector of an encoded block around the to-be-encoded pixel block; comparing the second cost with the first cost to determine one of the selected predictive mode and the direct mode as a determined predictive mode; and encoding the pixel block by the motion compensation predictive encoding according to the determined predictive mode, as disclosed in claim 1. Independent claims 2, 16, 17 and 19 are patentable for similar reasons as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
